

The MP System is available in three configurations. The MP-1 is the table top version of the MP-2. The MP-2 is a console unit with legs. Standard features include; electromagnetic seal jaw hold down, electronic temperature controllers, variable speed Teflon mesh belt shrink tunnel conveyor, film perforator roller for vent holes, and top, side and bottom heat vents in the tunnel. The MP-3 adds a variable speed L-sealer package discharge conveyor to the MP-2's standard features.
